# I am bored

Vue assignment

Your assignment.

Create a fun little app that suggest a random activity.

When a user clicks a button, the app suggests a random activity and changes the background color.

You can use the boredApi to get random data.

https://www.boredapi.com/api/activity

User can set it to covid19 mode so the api only suggests content for party of 1

https://www.boredapi.com/api/activity?participants=1

If the user likes an activity he can add that activity to his todo-list.
